

DC Address Anomalies Report

Office of The Chief Technology Officer

David Y Jackson

Last Update: MARCH '10

Address Anomalies

What is an Address Anomaly?

An address anomaly is an address whose location is illogical. In other words, the address does not follow the normal rules of Washington, DC's addressing grid system.

Types of Anomalies include:

- Wrong Block
- Out of Sequence
- Wrong Side of Street

Address Anomalies

Why do Address Anomalies matter?

Address Anomalies matter because these addresses are illogical realities that negatively affect the delivery of services. Delivery of services to these locations may take longer, or possibly not happen due difficulty in locating these addresses.

Address Anomalies Info

- DC GIS has spent hundreds of hours tracking down these cases and ensuring that the addresses in MAR match the reality on the ground.
- There are dozens of cases throughout the DC.
- DC GIS does not track Address Anomalies in Military Areas.
- Addresses in the Alley Streets are not considered as anomalies. This is due to the fact that there is generally not an expectation of logical addresses on the Alley Streets.
- Please see the notes section on each slide for more information regarding that anomaly.
- There is a possibility of additional address anomalies that are not documented.

- For more information please contact dcgis@dc.gov

Address Anomalies in NW
